PREFACE

Dear Reader,

Let us give thanks to the presence of Allah SWT, because of His blessings and grace we can re-publish the latest articles in the Journal of Animal Science Volume 24 Number 1 June Edition, Year 2024.

Articles published in the Journal of Animal Science Padjadjaran University have been selected and reviewed by the Editorial Team and peer-reviewed by Bebestari Partners who are competent in their respective fields. Only quality articles can be published in the Journal of Animal Science Padjadjaran University.

The topics presented in this edition include: indigofera pellet storage time; the reproductive status of sambar deer (*Cervus unicolor Kerr*); the implementation of health management for pig breeding; application of rectal exploration techniques for pregnancy diagnosis in goats; identification of worm parasites in beef cattle feces; the role of social media in mastering broiler livestock management; correlation between socio-economic characteristic and entrepreneur's motivation; potential of patikala fruit (*Etlintera elatior*); the role of GSH supplements in maturation media and cattle oocytes quality; the effect of closed house cage density on microclimate of broiler chickens; reproduction in dairy cattle post foot and mouth disease; quantity and quality of fresh and frozen cattle semen after thawing; estimated model of correlation environmental factor with crowing characteristics of Pelung chickens; and for the closing title, the relationship between parity to placental retention and the impact on days open and calving intervals in dairy cows at KPSBU Lembang.

We express our gratitude to the authors and partners who have contributed to the publication of this edition of the journal. We also invite research colleagues and practitioners in the field of animal husbandry to submit manuscripts to be presented in this journal. We welcome suggestions and constructive criticism from readers and other parties. Happy reading.
